OFIR AVIRAM

Solutions Architect | Software Built End to End with Generative AI
Systems Design, Full-Stack Development and Integrations

Hod Hasharon, Israel | +972-58-707-8708 | ofir.aviram@gmail.com | linkedin.com/in/aviramo

PROFESSIONAL SUMMARY

Experienced information systems professional with 15+ years in large enterprises across finance, healthcare, transportation and technology, and a B.Sc. in Industrial Engineering and Management.

Designs software solutions end to end: the problem, the user experience, the architecture, the data model, the business logic and the integrations, and now also leads the implementation, building full-stack systems and mobile apps with Claude and other generative AI tools.

Over the past year has independently built and shipped a mobile app and business systems: directing the AI tools, defining the behavior, reviewing every output and moving the work forward iteratively. Not an AI researcher or an ML engineer; the value is in turning a business need into a working system.

CORE EXPERTISE

SOLUTION ARCHITECTURE: End-to-End Solution Design, Software Architecture, Data Modeling, APIs and Integrations, Business Logic, UX and UI Specification, Security and Access Control
AI-ASSISTED DEVELOPMENT: Claude, ChatGPT, Directing AI Tools, Prototyping, Code Review, Iterative Delivery
FULL STACK: React Native, Expo, TypeScript, Node.js, Deno, Supabase, Edge Functions, PostgreSQL, Row Level Security (RLS), Git
ENTERPRISE SYSTEMS: SQL, Microsoft SQL Server, Azure SQL, Salesforce, Priority ERP, Workato, ETL, IAM, IDM
ANALYSIS AND DELIVERY: Functional and Technical Specifications, HLD and DD, UAT, Agile, Jira, Stakeholder Management, Production Deployment

INDEPENDENT WORK

DESIGNER AND DEVELOPER | MOBILE APP BUILT WITH AI

2026 - Present

Once | Self-Employed

- Designed and built a mobile app for location-based social meetups, end to end: the architecture, the business processes, the user experience and the screens, through development, testing and builds for mobile test distribution
- Developed with React Native and Expo, on Supabase, PostgreSQL, Edge Functions and TypeScript/Deno, and designed the data model and the access and security model with Row Level Security (RLS)
- Implemented real-time flows, detection of nearby users, matching mechanisms and a credit system
- Claude is the main tool in the process, and the work is directed by me: I define the requirements and the expected behavior, guide the AI in building it, review the output, solve problems and iterate

Live demo: https://once-lake.vercel.app/

DESIGNER AND DEVELOPER | MANAGEMENT SYSTEMS AND DIGITAL SOLUTIONS

Independent

- Designed and developed Web systems tailored to business needs: admin interfaces, forms, workflows and reports
- Designed the databases, the business logic and API integrations, in solutions for managing participants, sessions, payments, attendance and operational data
- Used AI tools to accelerate development and to implement the solutions

FOUNDER | WEBSITES, DIGITAL SYSTEMS AND AUTOMATIONS

FLOA | Self-Employed

- Designed and built websites and landing pages, including the user experience and interfaces
- Specified systems for managing leads, customers and business processes, and designed integrations and automations between services
- Used AI tools in specification, development and the improvement of digital solutions

PROFESSIONAL EXPERIENCE

SENIOR SYSTEMS ANALYST | WEB APPLICATIONS AND CORE SYSTEM INTERFACES
2025 - 2026

Tidhar Group | Israel | Hybrid

- Responsible for the specification and delivery of cross-system business processes and automations across Priority ERP, Salesforce and Workato, from the business requirement through to production
- Specified the interfaces between the core systems down to data mapping, business logic and validations, and designed data structures and scheduled SQL and ETL processes
- Worked on the TQA quality management system, in an Azure SQL environment and in workflows that spanned enterprise systems and development tools

SENIOR SYSTEMS ANALYST | WEB PORTALS AND CORE IDENTITY SYSTEMS
2021 - 2025

Brillix | Israel | Remote

- Responsible for the specification and implementation of Web-based core Identity Management systems at Clalit Health Services, Migdal, Ayalon and LivePerson
- Designed the solution end to end: identity processes, the interfaces and data transformations between the portal and the core systems, and the ETL and synchronization processes
- Led delivery across cybersecurity, DevOps, DBA, infrastructure, IT and business teams, through acceptance testing and production support

SYSTEMS ANALYST | WEB SOLUTION, UX AND UI FLOWS
2020 - 2021

Tel Aviv-Yafo Municipality

- Led the specification of a Web solution connecting municipal departments and automating cross-organizational processes, with user journeys, UX and UI flows and the data structures behind them

SYSTEMS ANALYST | CORE IDENTITY SYSTEMS
2017 - 2020

Amdocs | Israel

- Specified the organization's core Identity Management systems, from business and information-security requirements through to processes, interfaces and integrations, and guided a Java and JSP Web development team to production

SYSTEMS ANALYST AND IMPLEMENTATION CONSULTANT | CORE IDENTITY PLATFORMS
2014 - 2017

ProLink Identity Management Architects | Israel

- Owned the application-layer specification and implementation of the Aveksa IAM and Identity Governance platform at Harel, Migdal, Phoenix and Amdocs, including workflows, approval processes, data mappings and the interfaces to enterprise systems and databases

SYSTEMS AND DATA ANALYST | CORE BILLING SYSTEMS
2008 - 2014

Varonis | Israel

- Specified and developed a core enterprise billing system on Microsoft SQL Server, Microsoft Access and VBA, working directly with finance and operations

EDUCATION AND SERVICE

PRODUCT MANAGEMENT PROGRAM
Product Experts | 2021

B.SC. INDUSTRIAL ENGINEERING AND MANAGEMENT
Information Systems Specialization
Ben-Gurion University of the Negev | 2004 - 2008

COMBAT SOLDIER AND COMMANDER
Combat Engineering Corps | 1999 - 2002
