PROFESSIONAL SUMMARY

Solution Architect and Senior Systems Analyst with 15+ years of experience designing and delivering enterprise applications, system integrations, Identity and Access Management solutions, business process automation and web and mobile products across high-tech, healthcare, finance, insurance, construction and municipal organizations.

Combines deep systems-analysis experience with hands-on solution design and AI-assisted product development. Experienced in requirements discovery, functional and technical specifications, business logic, data flows, APIs, SQL, ETL, integration architecture, stakeholder management, testing and production delivery.

Able to take an initial business need or product idea, define the requirements, design the architecture and lead the solution through implementation until it becomes a working production system.

CORE COMPETENCIES

SOLUTION ARCHITECTURE: End-to-End Solution Design, Enterprise Applications, Integration Architecture, Business Logic Design, System Interfaces, Data Flows, Scalable Solution Design, Production Delivery

SYSTEMS ANALYSIS: Requirements Gathering, Requirements Analysis, Functional Specifications, Technical Specifications, Business Process Modeling, Data Modeling, User Flows, UAT and Acceptance Criteria

INTEGRATION AND DATA: REST APIs, System Integrations, SQL, ETL, SSIS, Workato, Salesforce, Priority ERP, Identity and Access Management, Identity Management

PRODUCT AND AI-ASSISTED DELIVERY: Product Discovery, Product Requirements, Product Ownership, User Experience, Rapid Prototyping, AI-Assisted Development, Automation, Cross-Functional Leadership, End-to-End Delivery

SELECTED PRODUCT AND INDEPENDENT EXPERIENCE

PRODUCT OWNER & AI-POWERED FULL-STACK DEVELOPER

2026 - Present

Once, AI-Powered Mobile Product | Self-Employed

Designed and built Once from initial concept to a production-ready mobile product, owning the complete product and technology lifecycle.

- Defined the product strategy, requirements, user journeys, user flows and UX
- Designed the solution architecture, database model, business logic, backend workflows and permissions model
- Built a real-time mobile dating product based on one person at a time, immediate invitations, proximity, activity and shared social Circles
- Developed authentication, location services, real-time chat, matching logic, credit mechanisms, social Circles, permissions and notification processes
- Developed the product using Node.js, TypeScript, Supabase, PostgreSQL, Edge Functions, RPC functions and API integrations
- Used Claude and ChatGPT for rapid prototyping, coding, debugging, refactoring, test-data generation, problem-solving and delivery acceleration
- Managed architecture, development, testing, troubleshooting and production releases end to end
- Prepared and submitted production releases for Google Play and the Apple App Store

PROFESSIONAL EXPERIENCE

SENIOR SYSTEMS ANALYST | INTEGRATION & SOLUTION DESIGN

2025 - 2026

Tidhar Group | Israel | Hybrid

Led end-to-end analysis and delivery of enterprise business processes, automations and system integrations across Salesforce, Priority ERP and Workato.

- Gathered and refined business requirements and translated them into functional and technical specifications
- Analyzed business processes, system dependencies, data flows and integration requirements
- Designed integration flows, data mappings, business logic, automations and system interfaces
- Worked with SQL, ETL processes and enterprise applications
- Coordinated delivery across business stakeholders, IT teams, vendors and implementation partners
- Supported testing, production deployment, troubleshooting and continuous improvement

SENIOR SYSTEMS ANALYST | IDM SOLUTION DESIGN

2021 - 2025

Brillix | Israel | Remote

Designed and implemented enterprise Identity Management solutions for Clalit Health Services, Migdal, Ayalon and LivePerson.

- Analyzed complex business, identity lifecycle and information-security processes
- Gathered requirements and created functional and technical specifications for IDM workflows, interfaces, data transformations and integrations
- Designed data mappings, ETL processes, business logic and system interfaces
- Worked closely with cybersecurity, DBA, DevOps, infrastructure, IT and business teams
- Led delivery from initial requirements and solution design through testing, troubleshooting and production rollout

SYSTEMS ANALYST | WEB SOLUTIONS & PROCESS AUTOMATION

2020 - 2021

Tel Aviv-Yafo Municipality

Led the analysis and design of an enterprise web solution connecting multiple municipal departments and automating cross-organizational workflows.

- Conducted requirements discovery with users, managers and business stakeholders
- Modeled business processes, data structures, system workflows and user journeys
- Designed UX and UI flows and wrote functional and technical specifications
- Designed SQL and SSIS-based integrations, data processes and automated workflows
- Coordinated users, development, DBA and QA teams from requirements through user acceptance and rollout

IDENTITY MANAGEMENT SYSTEMS ANALYST & TECHNICAL LEAD

2017 - 2020

Amdocs | Israel

Led the technical implementation of enterprise Identity Management solutions.

- Translated business and information-security requirements into workflows, interfaces, business logic and technical solutions
- Designed system processes, integrations and data flows
- Guided a development team working with Java and JSP
- Worked with Git, Jira and Agile delivery methodologies
- Coordinated development, cybersecurity, infrastructure, DBA, DevOps and IT teams
- Supported testing, troubleshooting, deployment and production delivery

IDM IMPLEMENTATION CONSULTANT & SOLUTION DEVELOPER

2014 - 2017

ProLink Identity Management Architects | Israel

Independently customized and implemented the Aveksa IAM and Identity Governance platform for major organizations, including Harel, Migdal, Phoenix and Amdocs.

- Owned the complete application-level solution design and implementation, excluding infrastructure
- Analyzed identity lifecycle, access-management, authorization and business requirements
- Designed and developed business logic, workflows, rules, approval processes and authorization processes
- Built integrations between the Aveksa platform and enterprise systems, databases and directories
- Designed data mappings, interfaces and synchronization processes
- Worked directly with customer stakeholders, information-security teams, IT, DBA and infrastructure teams
- Led testing, troubleshooting, deployment and production support

SOFTWARE DEVELOPER | ENTERPRISE BILLING SYSTEMS

2008 - 2014

Varonis | Israel

Developed, maintained and supported an enterprise billing platform and finance-related business processes.

- Developed solutions using Microsoft SQL Server, Microsoft Access and VBA
- Designed database queries, reports and business-process automations
- Analyzed business requirements and translated them into system enhancements
- Investigated production issues and implemented fixes and improvements
- Worked directly with finance and operational stakeholders
- Provided ongoing maintenance and production support

TECHNICAL SKILLS

ARCHITECTURE AND ANALYSIS: Solution Architecture, Systems Analysis, Solution Design, Requirements Gathering, Functional Specifications, Technical Specifications, Business Process Modeling, Data Modeling, Business Logic Design, UAT, End-to-End Delivery

INTEGRATION AND DATA: REST APIs, System Integrations, SQL, ETL, SSIS, Data Mapping, Workato, Salesforce, Priority ERP, IAM, IDM, IGA, Aveksa

DEVELOPMENT: Node.js, TypeScript, JavaScript, Supabase, PostgreSQL, Edge Functions, RPC Functions, Java, JSP, Git, Microsoft SQL Server, Microsoft Access, VBA

AI AND DELIVERY TOOLS: Claude, ChatGPT, AI-Assisted Development, Rapid Prototyping, Debugging, Refactoring, Test-Data Generation, Automation, Agile, Jira

EDUCATION

Product Management Program

2021

Product Experts

B.Sc. Industrial Engineering and Management

2004 - 2008

Information Systems Specialization | Ben-Gurion University of the Negev

MILITARY SERVICE

Combat Soldier and Commander

1999 - 2002

Combat Engineering Corps
