OFIR AVIRAM

Senior Systems Analyst | Web, Mobile and Core Systems
Specification, Integrations and End-to-End Delivery, with a Development Background

Hod Hasharon, Israel | +972-58-707-8708 | ofir.aviram@gmail.com | linkedin.com/in/aviramo

PROFESSIONAL SUMMARY

Senior Systems Analyst with 15+ years of experience specifying Web and Mobile systems, organizational core systems and complex integrations.

Translating business requirements into functional and technical specifications, designing interfaces and data structures, and carrying development from the requirement through to production.

A business view combined with technical understanding and hands-on ability in SQL and Web technologies.

A real development background behind that: six years writing software, and a mobile product built with Node.js, TypeScript, Supabase and PostgreSQL and shipped to both app stores.

CORE EXPERTISE

HANDS-ON DEVELOPMENT: Node.js, TypeScript, JavaScript, Supabase, Edge Functions, RPC Functions, Java, JSP, VBA, Git

SYSTEMS ANALYSIS: Business Requirements Gathering, Functional and Technical Specifications, High-Level Design (HLD), Detailed Design (DD), Use Cases, Acceptance Criteria, UAT

INTERFACES AND INTEGRATIONS: REST APIs, Web Services, System Interfaces, Integration Between Core Systems, Salesforce, Priority ERP, Workato, IAM, IDM, IGA

DATA: SQL, Database Design, Data Modeling, Data Mapping, ETL, SSIS, Microsoft SQL Server, PostgreSQL

WEB AND MOBILE: User Journeys, Screen Flows, UX and UI Specification, Mobile Releases, Google Play, Apple App Store

METHOD: Agile, Jira, Stakeholder Management, Vendor Management, Production Deployment

PROFESSIONAL EXPERIENCE

END-TO-END DEVELOPMENT — 2026 - Present

Once | Self-Employed

- Owned the specification and delivery of a Mobile application end to end, from requirements and user journeys through the backlog to acceptance testing and the release builds for the App Store and Google Play
- Specified the complex functionality behind it: authentication, location services, matching, real-time chat, a credit mechanism, social Circles and notifications, with their states, permissions and edge cases
- Designed the data model, the business logic and the service contracts between the application and the services behind it
- Built the application end to end with Node.js, TypeScript, Supabase, PostgreSQL and REST APIs, with Claude and ChatGPT, which is what keeps a specification one a developer can build and a tester can check

SENIOR SYSTEMS ANALYST | WEB APPLICATIONS AND CORE SYSTEM INTERFACES — 2025 - 2026

Tidhar Group | Israel | Hybrid

- Responsible for the specification and delivery of cross-system business processes and automations across Priority ERP, Salesforce and Workato, from the business requirement through to production
- Specified the interfaces between the core systems, functionally and technically, down to data mapping, business logic, validations, fields and user flows at screen level
- Designed data structures and scheduled SQL and ETL processes, on the basis of an analysis of the source data in each participating system
- Worked with business owners, IT teams and vendors through specification, testing and implementation

SENIOR SYSTEMS ANALYST | WEB PORTALS AND CORE IDENTITY SYSTEMS
2021 - 2025

Brillix | Israel | Remote

- Responsible for the specification and implementation of Web-based core Identity Management systems at Clalit Health Services, Migdal, Ayalon and LivePerson
- Specified identity processes end to end: self-service screens, approval flows, permissions, and the interfaces and data transformations between the portal and the core systems behind it
- Designed data structures, data mappings and scheduled ETL and synchronization processes against the organizational data sources
- Led delivery across cybersecurity, DevOps, DBA, infrastructure, IT and business teams, through acceptance testing, implementation and production support

SYSTEMS ANALYST | WEB SOLUTION, UX AND UI FLOWS
2020 - 2021

Tel Aviv-Yafo Municipality

- Led the specification of a Web solution connecting municipal departments and automating cross-organizational processes
- Specified user journeys and UX and UI flows at screen level, alongside the process modeling and the data structures behind them
- Designed SQL and SSIS interfaces and worked with users, development, DBA and QA through acceptance testing

SYSTEMS ANALYST | CORE IDENTITY SYSTEMS
2017 - 2020

Amdocs | Israel

- Specified the organization's core Identity Management systems, from business and information-security requirements through to processes, interfaces and integrations
- Specified system processes, data flows and data structures, and guided a Java and JSP Web development team through implementation and production delivery

SYSTEMS ANALYST AND IMPLEMENTATION CONSULTANT | CORE IDENTITY PLATFORMS
2014 - 2017

ProLink Identity Management Architects | Israel

- Owned the application-layer specification and implementation, excluding infrastructure, of the Aveksa IAM and Identity Governance platform at Harel, Migdal, Phoenix and Amdocs
- Specified business logic, workflows, rules, approval processes, data mappings and synchronization processes, and the interfaces to enterprise systems, databases and directory services

SYSTEMS ANALYST & DEVELOPER | CORE BILLING SYSTEMS
2008 - 2014

Varonis | Israel

- Specified and developed a core enterprise billing system on Microsoft SQL Server, Microsoft Access and VBA
- Analyzed billing data and turned business questions into SQL queries, reports and automations, working directly with finance and operations

---

EDUCATION AND SERVICE

PRODUCT MANAGEMENT PROGRAM
Product Experts | 2021

B.SC. INDUSTRIAL ENGINEERING AND MANAGEMENT
Information Systems Specialization
Ben-Gurion University of the Negev | 2004 - 2008

COMBAT SOLDIER AND COMMANDER
Combat Engineering Corps | 1999 - 2002
