

OFIR AVIRAM

Full-Stack Developer | Node.js, TypeScript, PostgreSQL

Product Built End to End, on 15+ Years of Enterprise Systems

Hod Hasharon, Israel | +972-58-707-8708 | ofir.aviram@gmail.com | linkedin.com/in/aviramo

PROFESSIONAL SUMMARY

Full-Stack Developer who took a mobile product from an empty repository to Google Play and the App Store: data model, business logic, authentication, real-time processes, APIs, permissions and the releases themselves.

Behind that, 15+ years in enterprise systems, six of them writing software and the rest designing the systems other developers built: business logic, integrations, data models, SQL and ETL.

Works in Node.js, TypeScript, Supabase, PostgreSQL, Edge Functions and REST APIs, with Claude and ChatGPT inside the daily loop for prototyping, debugging, refactoring and test data.

CORE EXPERTISE

END-TO-END PRODUCT DEVELOPMENT: Turning an idea or a business requirement into a working product, including product definition, architecture, data modeling, business logic, integrations, development, testing and production deployment

BACKEND AND DATA: Data Modeling, Business Logic, APIs and Service Contracts, Permissions and Row-Level Security, Real-Time Processes, SQL and ETL

TECHNICAL SKILLS

LANGUAGES AND RUNTIME: TypeScript, JavaScript, Node.js, SQL, Java, JSP, VBA

DATA: PostgreSQL, Supabase, Microsoft SQL Server, Database Design, Data Modeling, ETL, SSIS, Microsoft Access

BACKEND AND APIS: REST APIs, Web Services, Edge Functions, RPC Functions, Authentication, Permissions and Row-Level Security, Real-Time Processes

DELIVERY AND TOOLS: Git, Google Play, Apple App Store, Jira, Agile, Claude, ChatGPT, AI-Assisted Development

EXPERIENCE

FULL-STACK DEVELOPER & PRODUCT OWNER

2026 - Present

Once | Self-Employed

- Took Once from concept to a production mobile product, owning the architecture, the database, the backend and the releases
- Designed and built the data model, business logic, backend workflows, permissions and real-time processes
- Built authentication, location services, matching, real-time chat, credit mechanisms, social Circles and notifications
- Developed with Node.js, TypeScript, Supabase, PostgreSQL, Edge Functions, RPC functions and REST APIs
- Used Claude and ChatGPT for prototyping, coding, debugging, refactoring, problem-solving and test-data generation
- Prepared and submitted the production releases for Google Play and the Apple App Store

INTEGRATIONS AND AUTOMATION | SENIOR SYSTEMS ANALYST

2025 - 2026

Tidhar Group | Israel | Hybrid

- Built and delivered enterprise automations and integrations across Salesforce, Priority ERP and Workato
- Designed data mappings, business logic, integration flows, service interfaces and scheduled SQL and ETL jobs
- Translated business requirements into functional and technical specifications
- Coordinated business stakeholders, IT teams, vendors, testing and production deployment

IDM IMPLEMENTATION | SENIOR SYSTEMS ANALYST

2021 - 2025

Brillix | Israel | Remote

- Implemented enterprise Identity Management systems for Clalit Health Services, Migdal, Ayalon and LivePerson
- Built identity processes, interfaces, data transformations, data mappings and scheduled ETL and synchronization jobs
- Created functional and technical specifications for identity processes, interfaces and integrations
- Led delivery across cybersecurity, DBA, DevOps, infrastructure, IT and business teams

SYSTEMS ANALYST | WEB SOLUTION AND SQL INTEGRATIONS

2020 - 2021

Tel Aviv-Yafo Municipality

- Designed a Web solution connecting municipal departments and automating cross-organizational workflows
- Built SQL and SSIS integrations and modeled the processes, data structures and screen flows behind them
- Coordinated users, development, DBA, QA and user acceptance testing

TECHNICAL LEAD & SYSTEMS ANALYST | JAVA, JSP

2017 - 2020

Amdocs | Israel

- Guided a Java and JSP development team through implementation, testing and production delivery
- Turned business and security requirements into technical processes, business logic, interfaces and integrations
- Coordinated development, cybersecurity, infrastructure, DBA, DevOps, testing and production delivery

SOLUTION DEVELOPER & IMPLEMENTATION CONSULTANT

2014 - 2017

ProLink Identity Management Architects | Israel

- Independently customized and implemented the Aveksa IAM and Identity Governance platform for Harel, Migdal, Phoenix and Amdocs
- Owned the application-level solution design and implementation, excluding infrastructure
- Built business logic, workflows, rules, approval processes, data mappings and synchronization processes
- Built integrations with enterprise systems, databases and directories, and led testing, deployment and production support

SOFTWARE DEVELOPER | ENTERPRISE BILLING SYSTEMS

2008 - 2014

Varonis | Israel

- Developed and maintained an enterprise billing platform using Microsoft SQL Server, Microsoft Access and VBA
- Turned business requirements into database queries, reports, automations and system enhancements
- Investigated production issues and worked directly with finance and operational stakeholders

EDUCATION AND SERVICE

PRODUCT MANAGEMENT PROGRAM

Product Experts | 2021

B.SC. INDUSTRIAL ENGINEERING AND MANAGEMENT

Information Systems Specialization

Ben-Gurion University of the Negev | 2004 - 2008

COMBAT SOLDIER AND COMMANDER

Combat Engineering Corps | 1999 - 2002
